additional tips and tricks.

## <How to use>

### RECOMMENDATION

It is recommended to  
remove contact lenses  
before each lifting  
treatment.

### 1 CLEAN SKIN AND LASHES

Clean lashes and skin  
with micellar water.

2

### PLACE THE EYE PADS

Apply hydrogel eye pads on the lower lash line.

3

### CLEAN THE LASHES

Degrease and clean the lashes with a microbrush and cleanser.

4

### ANALYZE THE LASHES

Choose a lifting pad based on the shape of the eyes and the length and density of the lashes.

### Flat Pads

- Size S: Suitable for short lashes (4-5 mm).
- Size M: Suitable for short to medium lashes (6-7 mm).

### Curved Pads

- Size M1: Suitable for medium lashes (8-9 mm) and hooded eyes.
- Size M2: Suitable for long, downward-growing lashes (10-11 mm) and hooded eyes.
- Size L: Suitable for very long lashes (12-13 mm).

## 5 APPLY GLUE AND FIX LASHES

Apply glue to the inside of the pads, place them along the lash line, and adjust any hidden hairs if necessary.

## 6 GLUE THE LASHES ONTO THE PAD

Apply the lifting glue or balm glue on the surface of the pads and fix the lashes neatly onto them. Ensure precise separation and placement.

## 7 APPLY LOTION #1

Apply Lifting Lotion #1 on the lower third of the lashes, sparing 1 mm at the roots and tips.

**CAUTION:** Heat and moisture accelerate the effect of the lotion.

## 8 REMOVE LIFTING LOTION #1

After the desired exposure time, remove the lotion with a dry cotton swab.

Exposure times	Lifting Lotion #1	Setting Lotion #2	Keratin Intensive Lotion #3
Very fine hair	4 – 5 minutes	3 minutes	4 minutes
Normal hair	5 – 6 minutes	3 minutes	4 minutes
Thick hair	6 – 7 minutes	3 minutes	5 minutes
Very thick hair	7 – 8 minutes	3 minutes	5 minutes

11

## 9 APPLY SETTING LOTION #2

Apply Setting Lotion #2 on the lower third of the lashes, sparing 1 mm at the roots and tips.

## 10 REMOVE LOTION #2

After 3 minutes, carefully remove the lotion and clean the lashes.

## 11 PREPARE THE TINT

For a perfect result, tint the lashes with the andmetrics professional Brow & Lash Tints, mixing the color 1:1 with either creamy or liquid tint developer

### TINT DEVELOPER LIQUID

1:1

Mixing ratio

1cm tint : 8-10 drops

Hydrogen peroxide  
3 % 10VOL!

### TINT DEVELOPER CREAM

1:1

Mixing ratio

1cm tint : 1cm developer

Hydrogen peroxide  
3 % 10VOL!

Our tint shades:

No. 1

No. 1

No. 2

No. 3

No. 3<sup>1</sup>

No. 4

**12 TINT THE LASHES**  
Completely cover the lashes with dye for about 5 minutes.

**13 REMOVE THE TINT**  
Carefully remove the lash tint and clean them afterwards.

**14 APPLY KERATIN LOTION**  
Apply the Keratin Intense Lotion #3 on the lashes, and remove after 4-5 minutes depending on the hair type.

**15 REMOVE PADS & CLEAN**  
Remove the hydrogel eye pads and carefully detach the lashes from the lifting pads. Clean the skin thoroughly and comb the lashes.

*Important Note!*

For a perfect, long-lasting result, avoid contact with decorative cosmetics, water, toner, makeup remover, etc., on freshly lifted lashes for 24 hours.

*Professionals Love.*
